

IN PARTNERSHIP WITH BREWARRINA MPS

GWII GULLI DULLABAH

“BLOOD WITHOUT WATER”

WITH RENAL PHYSICIANS DR COLIN MCCLINTOCK AND
DR JENNIFER FIORE-CHAPMAN

23RD MARCH 2023

Screening for undiagnosed Renal issues was provided to 22 Indigenous residents of the Brewarrina Community, most of whom were older and had pre-existing chronic diseases like diabetes and renal disease. Only one attendee was non-Indigenous.

The day targeted Indigenous residents of Brewarrina community who were at risk of developing renal disease and failure. Participants included those with diabetes and renal issues under the care of Drs McClintock and Fiore-Chapman. Some participants did not attend ACP or HbA1c testing, as they did not want to provide a urine specimen or wait for the testing to be completed.
