

YEAR 12 STUDENT VISIT 13.9.2022

WAMS invited students to take a tour of the premises. The tour, and discussions, will help us determine who is interested in potential employment and to guide and mentor the students.

The tour commenced in the Chronic Disease Building, with the Eye Health Room and Children's Therapy Room.

The students were also briefed on all the various specialists services that visit WAMS. The Chronic Disease Receptionist, Acting Chronic Disease Manager and Exercise Physiologist were introduced and they provided details of their roles. Another staff member spoke about Diabetes and how she works between four towns.

Next was the administration building and the students were introduced to the Finance Manager and Executive Support Officer and each discussed their role in the organisation.

At the New Development Building students were shown the Exercise Therapy Room and the type of clients that use the facility.

At the Clinic, the Clinic Manager, RN and Receptionist gave descriptions of their roles.

The last stop was Goonimoo and the students really enjoyed the playroom, toys and books. The Acting Goonimoo Manager and Assistant explained their roles and the importance of children learning through play.

Lunch was provided and this allowed the students to engage with our GP Registrar who chatted about her role at WAMS. Overall the students enjoyed their visit.
